

# WHICH OF THESE IS A STRONG PASSWORD?

## HELPFUL TIPS

- Longer is stronger. Each character that you add to your password increases the protection that it provides many times over. Passwords should be 8 or more characters in length; 14 characters or longer is ideal.
- Use a combination of upper and lowercase letters, numbers, and symbols. The greater variety of characters that you have in your password, the harder it is to guess.
- Use words and phrases that are easy for you to remember, but difficult for others to guess.
- Never share your password with anyone. As the owner of the account you are responsible for all activity (legitimate or illegitimate) associated with that account.
